

# Class: **Formal Logic**

Teacher: Bethany Barnosky

Choosing the right class can be tricky, and we want to make the process as easy as possible. We are committed to your student's success, in this year's class(es) as well as their future academic pursuits. **Is your student ready for Formal Logic?** Let's find out!

- Grade level 10+ and Age 15+
- Your student has completed Algebra 1 and Geometry
- Your student is interested in deductive reasoning -- proving with certainty that their conclusion is 100% correct. Think Sherlock Holmes or Mr. Monk.
- Your student loves to learn and is willing to try out something new.
- Your student has the resilience to dig in and try hard things.
- Your student has mastered planner usage, organizing school work, and reading textbooks, and can execute these skills independently
- Your student has excellent time management skills, works well with both teachers and peers, and is proficient in both note taking and general study skills.
- Your student adheres to the highest standards of academic integrity.

Your student is **well prepared** for success in Formal Logic.

- Grade level 8-9 and Age 12-14
- Your student has completed Algebra 1
- Your student is *very* interested in deductive reasoning -- proving with certainty that their conclusion is 100% correct.
- Your student loves to learn and is willing to try out something new. They have the resilience to dig in and try hard things.
- Your student has mastered planner usage, organizing school work, and reading textbooks, *and is practicing* time management, note-taking, and general study skills.
- Your student has consistent support and a parental-learning-partner.

You can **support your student** in their Formal Logic studies.

Your student *can* be successful! They just need your support to maximize their learning.

- Grade level  $\leq 6$  and Age  $\leq 11$
- Your student is unwilling to study Formal Logic
- Your student does not want to prove a point with certainty or make a claim and back it up with evidence.
- Your student does not own their own learning. They lack time management and/or study skills and expect that a parent or teacher will walk them through each problem and assignment.
- Your student does not value academic integrity.

Your student **does not yet** have the foundation they need to be successful in Formal Logic.
